

Field Notes

(McKay Survey)

By: V. R. Fraley

Reg. No. 183

In Sec. 5, T.4N., R. 28 E. W. M.

I found the Quarter Corner between Sections 4 & 5, which is a 8"by 8"
by 16" stone plainly marked with ($\frac{1}{2}$) ^{and two} and two hash marks.

I reestablished the S. E. Corner of Section 5, which is described
in my field notes for Section 9.

Found the Section Corner common to Sections 5-6-7-8.

From this information the survey was accomplished as shown on
the accompanying sketch.
