**Description**

Lots 1, 2, 3, and 4 of Block 3 of Railroad Addition to the Town of Centerville (Athena).

**Narrative of Survey**

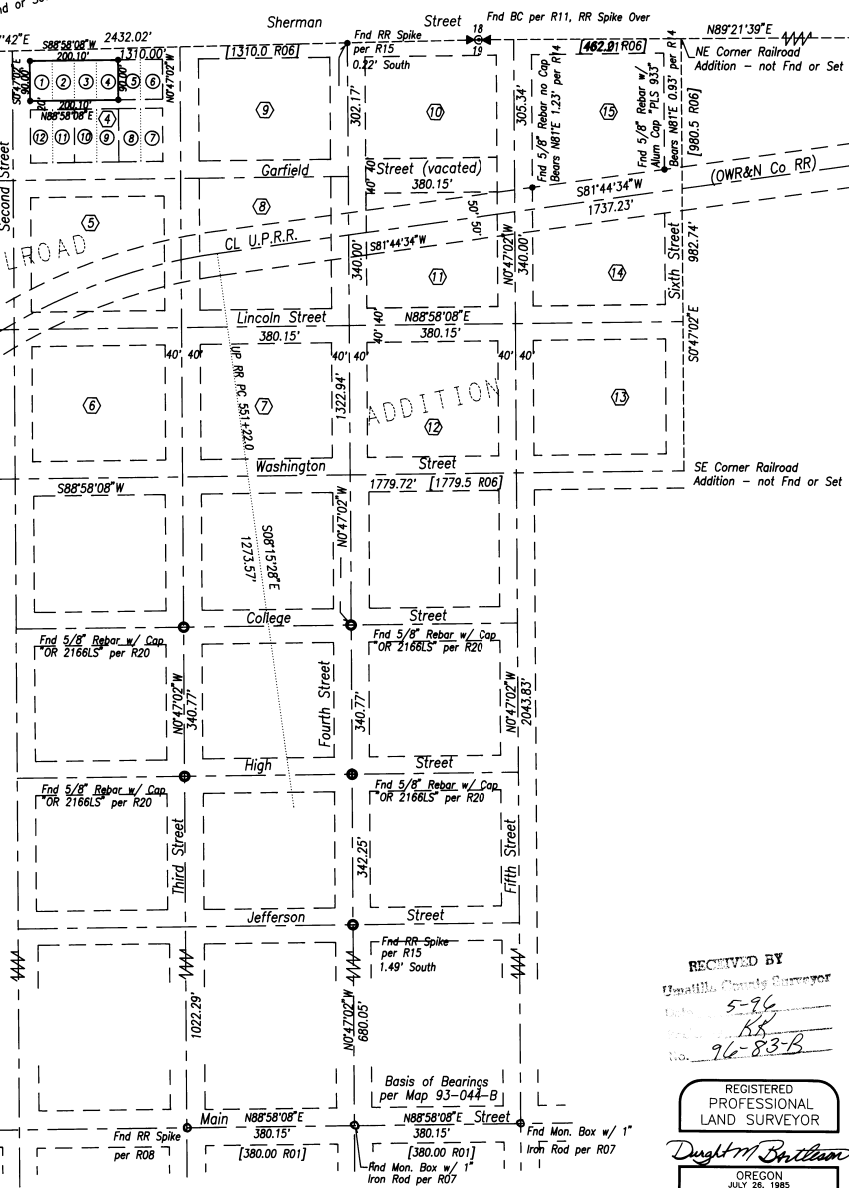

A survey to monument Lots 1, 2, 3, and 4 of Block 3 of Railroad Addition to the Original Town of City of Athena.

Survey commenced March 23, 1996. Instrument used was a Topcon GTS2-06. Four angles were measured by repetition for the control traverse.

Bearings are Grid, Oregon Coordinate System of 1983, North Zone, and are based on observations from Athena NGS, theta < +1" 26' 23".

As was noted Map 90-011-A, and subsequent surveys, the distance from Main Street to the North line of Section 19 is 3.72 feet longer than the platted dimensions, which are vague.

The method used to calculate these dimensions was: to set North-South streets parallel to monumented Fourth Street; to set East-West Streets parallel to Main Street; using the dimensions of Railroad Addition, to set the North Lines of Railroad Addition to the currently accepted positions of section corners to the East and West, and to evenly proportion the excess distance between Main Street and Washington Street.
