

T. 4 N., R. 28 E., W.M.

Chains		Feet
40.00	Set trial 1/16 corner.	
79.92	$\frac{1}{4}$ corner.	
<hr/> <p>The <math>\frac{3}{4}</math> cor. on S. Bdy. of sec. 10 and <math>\frac{1}{4}</math> cor. on N. Bdy. being intervisible, I placed a 2 x 4 ins. stake mkd. 1/16 at the intersection of the 2 <math>\frac{1}{2}</math> lines as a 1/16 cor. at center of sec. and chaining to trial 1/16 cor. find the distance equal to 0.04 chs. I then set 2 x 4 ins. stake mkd. 1/16 as SW cor. SE <math>\frac{1}{4}</math> NE <math>\frac{1}{4}</math> on line in its proper place, that is 19.98 chs. from center of the sec.</p> <hr/>		
<p>Ran N. 0° 28' E. along line from center of the sec. to <math>\frac{1}{4}</math> cor. on N. Bdy. from center of the sec.</p>		
20.00	Set trial 1/16 cor. on line.	
40.12	$\frac{1}{4}$ cor.	
<p>Set 2 x 4 ins. stake mkd. 1/16 as SW cor. NW <math>\frac{1}{4}</math> NE <math>\frac{1}{4}</math> on line in its correct position, that is, 20.06 chs. from the center of the sec.</p> <hr/>		
<p>The NW cor. of sec. 10 being visible from the <math>\frac{1}{4}</math> Cor. on the W. Bdy. of sec. 10, ran N. 0° 26' E. from above <math>\frac{1}{4}</math> cor. along W. Bdy. of the sec.</p>		
40.08	NW cor. Sec. 10.	
<hr/> <p>The NE cor. sec. 10 and the <math>\frac{1}{4}</math> cor. on E. Bdy. being inter- visible</p>		
<p>I ran N. 0° 30' E. from above <math>\frac{1}{4}</math> cor. along the E. Bdy. of Sec.</p>		
10.00	Set trial stake on line.	
20.00	Set trial 1/16 cor. on line.	
40.16	NE cor. sec. 10.	
<p>I then set the following cors. on line measuring from the <math>\frac{1}{4}</math> cor.</p>		
10.04	Set 2 x 2 ins. stake as NE. cor. Farm Unit N.
