

Resurvey of portion of the E. Bdy. of T 4 N., R. 38 E., W.M.

Chains		Feet
	<p>July 20, 1905: At this cor. I set off 20° 42' N. on the decl. arc; and at 12 h. and 6 m. l.m.t. observe the sun on the meridian. The resulting latitude is 45° 52' N.</p> <p>Thence I run</p>	
	<p>S. 0° 39' W. on a resurvey bet. Secs. 1 & 6, over rolling ground, through heavy timber and dense undergrowth.</p>	
14.75	<p>A spring branch, 2 lks. wide, course S.E.</p>	
	<p>Leave heavy timber and dense undergrowth, brs. E. & W.</p> <p>Thence descend precipitous S. slope.</p>	
34.50	<p>Intersect the old $\frac{1}{4}$ Sec. Cor., which is a basalt stone, 15 x 14 x 8 ins. marked as described by the surveyor general. The tree described by the surveyor general as a fir 16 ins. in diam. bearing N. 46° W. 180 lks. dist. cannot be found. I re-established the cor. at the same point as follows:</p>	
	<p>Set a basalt stone, 16 x 14 x 8 ins. 11 ins. in the ground for $\frac{1}{4}$ Sec. Cor. marked $\frac{1}{4}$ on W. face, and raised a mound of stone, 2 ft. base and a/ft. and a half high W. of Cor. Therefore the N. half of this line is 34.50 chs. in length and brs. S. 0° 39' E. I continue the resurvey S.</p> <p>Descend over precipitous ground.</p>	
77.25	<p>Intersect the old cor. for secs. 1, 6, 7 & 12, which is a basalt stone, 20 x 10 x 5 ins., marked as described by the surveyor general. No trace remains of the mound of stone described by the surveyor general. I re-establish the cor. at the same point as follows:</p>	
	<p>Set a basalt stone 20 x 10 x 5 ins. in a mound of stone on stony ground for cor. of secs. 1, 6, 7 & 12, marked with 1 notch on the N. and 5 notches on the S. edge; and raised a mound of stone, 2 ft. base and a/ft. and a half high W. of the cor.</p>	
	<p>Therefore the S. half of this line is 42.75 chs. in length and brs. S.</p>	
	<p>Land; mountainous.</p>	
	<p>Soil; fir and second rate.</p>	
	<p>Timber, fir, pine, spruce;</p>
